

APOLLO TECHNOLOGIES INC.

Invites you to a Technology Briefing on

Enterprise Applications and the Cloud Infrastructure: Technologies & Trends

This briefing covers topics on the relevant technologies and trends using Cloud Infrastructure to meet the demands and requirements of Enterprise Applications. The briefing shall touch on:

- What is the Cloud?
- Open Source Cloud Infrastructure
- Requirements of Enterprise Applications
 - o Reliability
 - o Scalability
- Proven Approach
 - o Automated Failover: Heartbeat
 - o Load balancer: Apache2 or Nginx
 - o Application Servers: Apache Tomcat or Jetty
 - o Distributed Session Store: memcache
 - o Database Cluster: Mysql cluster

Apollo Technologies shall also share information on Cloud-based applications in real world enterprises and communities. It shall share its experience in successfully building:-

1. A real-time supply chain solution for 7-Eleven, the world's largest convenience store chain
2. A mission-critical trade system that handles processing for the Bureau of Customs and the Philippine Economic Zone Authority (PEZA)
3. An innovative electronic payment system that handles myriad of payment options

Mr. Gary Lauriano, President, and Mr. Jessie Evangelista, Chief Technology Officer, shall conduct the Briefing.

Apollo Technologies is also looking to establish a presence in Davao by April 2012. The Briefing would provide an opportunity to ask the President and the CTO about available opportunities for projects and long-term employment.

The Briefing shall be held on January 27, 2012 at F607 from 3:40-5:00pm.
