

Software Developer – C# ASP.NET

We are seeking a Software Developer to work on websites, web services, and other applications to help us take our software development efforts to the next level. This is a full time employee position located in Davao. The employer is a well established, 12 year old company headquartered in Utah, USA. Some short term travel to the US may be required.

Primary Responsibilities:

- Produce quality software products according to specifications
- Unit testing of own programs
- Participate in code reviews and other quality processes
- Follow coding standards and process guidelines

Required:

- Service attitude
- Technical aptitude in software development and architecture
- 3+ years in C# and/or ASP.net Microsoft web development
- Ability to work well under time pressure, maintaining positive interpersonal relationships
- Desire to achieve high standards of team and personal performance
- Problem solving and analytical ability
- BS in Computer Science, Information Systems, or a related field, or equivalent experience
- Experience in implementing best practices in software development
- Excellent written and spoken English skills

Preferred:

- Masters Degree in CS or similar technical field
- Experience in Scrum methodology

To apply please submit a resume, and cover letter including your current (or most recent) salary, to: jjunsay@certiport.com or Slumbab@certiport.com
